Eric Ryan Corporation FAQ

How Much Does An Audit Cost?

The audit itself is absolutely **FREE**. Once the audit process is complete, Eric Ryan Corporation is compensated with percentage of the savings achieved through the implementation of the opportunities identified. If the audit fails to yield any cost reductions there is no charge to the client.

What Is My Organization's Obligation To Implement Eric Ryan Corporation's Recommendations?

None at all. You have the right to choose any or all of the Eric Ryan Corporation's recommendations. We only share in the savings on the recommendations implemented.

How Much Of Our Organization's Time Is Required To Complete An Audit?

Very little time is required on the client side. Eric Ryan Corporation will need two months' telecom bills (i.e. local, long distance, internet, data, wireless) and the past twelve months' utility bills (i.e. natural gas, electric, water, sewer) for analysis. Eric Ryan's team of billing experts will handle the rest.

"We strive to become an extension of our clients' business by serving as an ongoing consultant throughout the contract period. We provide our clients with additional value added services that complement the audit process. These additional services give us the privilege to continue to serve clients after the initial contract period."

- Keith Venezie, Founder and CEO

Utility And Telecommunications Billing Experts

Contract Analysis and Negotiation, Tax Analysis & Recovery, Rebate & Incentives, Procurement, Utilities, Telecommunications, Bill Auditing,

Energy Procurement

Eric Ryan Corporation's expert energy procurement managers will develop and submit a request for proposal based on their clients' **unique needs**. Eric Ryan Corporation will evaluate the pricing and the suppliers to determine the best program for the client.

Our long-term relationships with reputable energy providers ensure we capture the best possible market price offered the first time, every time. Our experience protects our clients from **hidden charges**, unexpected fees, and other pricing tricks employed by energy providers to capture new business.

Our procurement department searches for energy pricing and contract options **proactively** for our clients, not reactively like many of our competitors. We do not wait for contracts to expire - we act at the most cost-effective time to make any changes to our clients' **energy agreements**.

Energy Services And Engineering

For many organizations, energy use is one of the most controllable operating expenses. Eric Ryan Corporation's team of experienced engineers can verify that critical on site equipment is **energy efficient** and **cost effective** through our comprehensive energy site surveys. Eric Ryan Corporation can offer creative **financing options** to help implement cost saving equipment and facility upgrades.

Eric Ryan Corporation provides energy management services including commercial **energy audits**, commercial lighting audits, and incentive/rebate research and implementation. Additional energy services include **power factor** correction, energy management software implementation, **tax analysis and recovery**, product reviews, and Energy Service Company "ESCO" evaluations and savings verification.

Energy management services have been carried out throughout the United States, Canada, and the Caribbean, saving clients over 50 million dollars in energy costs.

Telecom Auditing And Consulting Services

Eric Ryan Corporation will analyze and review your organization's local, long distance, wireless, and data service billings for billing errors or unnecessary fees and will fight to **get your money back**. Eric Ryan Corporation's auditors will also make recommendations for future telecommunications cost reductions.

Eric Ryan Corporation's experts can evaluate an organization's existing voice and data networks for additional cost reduction opportunities and improved service. Eric Ryan Corporation will **negotiate with equipment vendors** and telecommunications service providers to ensure our clients are capturing the best market rates available.

Eric Ryan Corporation also offers on-site telecommunications surveys of any equipment, lines, etc., to identify any potential saving opportunities.

Utility Auditing And Consulting Services

Eric Ryan Corporation will analyze and review your organization's bills to uncover any unnecessary fees or billing errors and will **fight to get your money back**. Eric Ryan Corporation's auditors will also make recommendations for future utility cost reductions.

Eric Ryan Corporation will determine if our clients qualify for a **better rate** schedule or tariff rider specific to the organization's needs that will reduce a given utility expense.

Eric Ryan will implement and monitor all cost saving opportunities identified and employed throughout the contract period and provide monthly reports showing the **savings captured** under each utility.
